Subject: I/M/O Lansing Rod and Gun Club Docket No. RCRA-02-2016-7301

Dear Mr. Oropallo,

This email communication is in response to your November 20, 2017 email, in which you proposed that EPA delay holding a teleconference until after the holidays (i.e., until January) to discuss EPA's concerns regarding the Club's delayed compliance with the Order.

Please be advised that I have discussed your proposal with Ed Guster, my program client, and our respective managers. EPA's managers are concerned with further delaying the teleconference call while the Club continues to put lead shot into the nearby Salmon Creek and wetlands area near the shooting ranges. Hence, EPA is anxious to move the Club's compliance with the Order along.

That being said, shortly, I will provide you with proposed dates and times EPA representatives will be available to schedule the requested teleconference call with you and Club representatives. However, in the meantime, EPA requests that the Club provide and/or advise EPA with the following information as soon as possible, **but no later than January 8, 2018:**

1) What is the current status of the Club's discussions/negotiations with the Town? What is the Club's alternative option to address and prevent lead shot from going into Salmon Creek and the nearby sensitive wetlands area since the previous option is no longer feasible.

2) Did the Club submit a permit application? We understand from Ed Guster's September 13, 2017 site visit, the Club is pursuing a different option and seeking a permit instead of the shot curtain option the Club previously agreed upon under the Order, prior to the flooding. If so, please provide EPA with a copy of the permit application.

3) Please revise the Club's previously submitted Environmental Stewardship Plan (ESP). EPA will determine if public participation is required due to revision to the ESP.

We look forward to timely receipt of the above requested information and status report on the Club's actions taken to date to address prevention of lead shot continuing to go into Salmon Creek and the nearby wetlands area. Best regards for the Holidays.

Sincerely,

Melva J. Hayden
